

Kirsch® Automation Repeater

QUICK START GUIDE

1 Plug Repeater into wall outlet

The LED blinks AMBER, indicating the Repeater has power, but has not yet been joined to an Automation Shade Network.

- Be sure the wall outlet has power.
- No more than six Repeaters should be used in a home, unless otherwise instructed.
- Do not place Repeater in direct sunlight.

2 Pair Repeater to Automation Shade Network (if using the Kirsch® Automation App)

- Open the Automation App and select "Device Discovery."
- Follow the on-screen instructions to set up each Repeater. The Repeater LED turns solid BLUE to indicate the Repeater has been paired to the network. Follow in-app instructions to assign a custom Repeater LED color, if desired.

3 Pair Repeater to Automation Shade Network (if using the Kirsch Automation Remote)

- Press and hold ■ "Stop" on the remote that was used to create the Automation Shade Network until the lights on the remote flash (approx. 6 seconds).
- With the remote no more than 3 feet from the Repeater, press and release ■ "Stop"
- The Repeater blinks BLUE three times to signal it has been joined to the network. After the blinking stops, the Repeater is still active.

Troubleshooting

My Repeater does not flash after sending a test signal from the Automation Hub.

- Verify there is power to the outlet in which the Repeater is plugged.
- Add the Repeater to the shade network via instructions in this guide.

Resetting the Repeater

To reset the Repeater and activate learning mode, press and hold the Repeater's button until the LED blinks AMBER, indicating the Repeater has power but has not been paired to a shade network.

Test signal to Repeater

Press and hold the **P** button on the back of the Automation Hub to pair the Repeater to the shade network via the Automation App or remote if you have not already done so. The light on the Repeater flashes BLUE three times. If it does not, you may need to move the Repeater to another location or add an additional Repeater.

U.S. Radio Frequency FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

120VAC 0.03A
60Hz 0-45°C
Indoor use only
125V 15A Receptacle

The light source of this luminaire is not replaceable; when the light source reaches its end of life the whole luminaire shall be replaced.

Industry Canada

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Class B Digital Device Notice

This Class B digital apparatus complies with Canadian ICES-003, RSS-Gen and RSS-210.
